# What is NEURO EGO?

**Is a simple headband that:**

1. Reads brainwaves
2. Turns thoughts into actions, text and sounds

It helps people with major physical disabilities to communicate and interact with their environment more easily.

NEURO EGO

# Approach and data

**EEG sample**
2,548 features

→

**Random Forest**
baseline classifier

→

**Emotion**
positive, neutral, negative

→

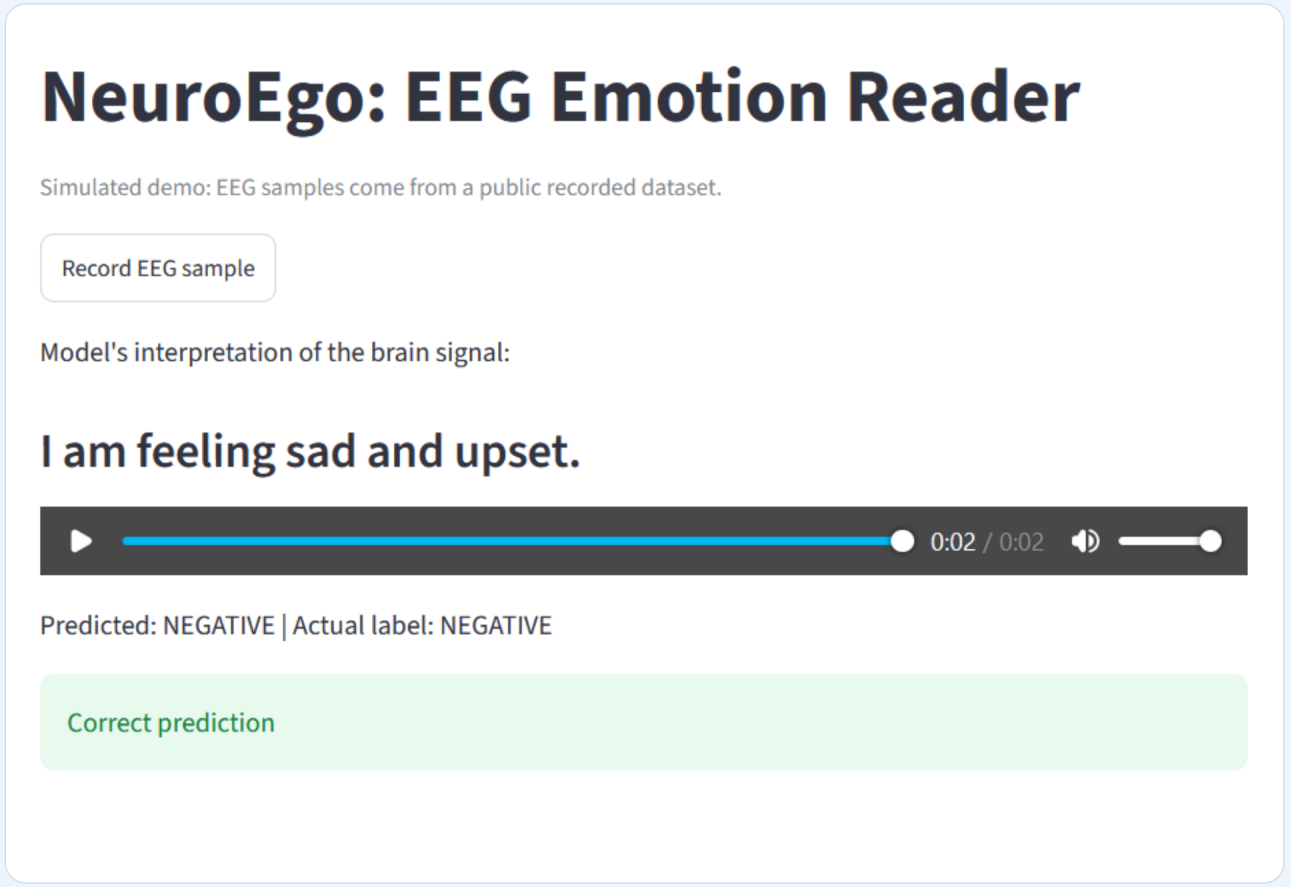

**Sentence + voice**
text-to-speech

**2,132**
recorded EEG samples

**3**
balanced classes (716 / 708 / 708)

**0**
missing values

Tools: Python, Streamlit, Hugging Face

# Demo

1. Press “Record EEG sample”: a random recorded sample is picked
2. The model predicts the emotion
3. The result becomes a sentence, spoken aloud
4. We compare with the actual label

Simulated: recorded public EEG data stands in for the headband.
